 Something to note.

Inline source

```
public class HelloWorld { ①
  public static void main(String[] args) { ②
    // Prints "Hello, World" to the terminal window. Here is some very large comment
that should cause an overflow
    System.out.println("Hello, World");
  }
}
```

① The class name

② The main method

Referenced source

```
public static void main(String[] args) { ①
  System.out.println("Hello, World");
